- 1) Equivalent to the max. initial contact resistance is 100mΩ (1A 6VDC).
- 2) 25°C, measured when coil is energized with 100% nominal voltage.
- 3) The value is measured when voltage drops suddenly from nominal voltage to 0 VDC and coil is not paralleled with suppression circuit.
- 4) Since it is an environmental friendly product, please select lead-free solder when welding. The recommended soldering temperature and time is 240°C to 260°C, 2s to 5s.
